Note: For chairs with S/N prior to R4-023230 no individual parts are available, please order complete Axle Plate assembly.

NOTE: When changing the chairs REAR SEAT to Floor Height, refer to Dimension "C" below. If 'increasing' or 'decreasing' the height determine the current length "C" and then move up or down the chart until you 'increase' or 'decrease' to get to the desired height. Then order the corresponding Axle Plate size. EXAMPLE: If the dimension "C" was 3.70" and I wanted to increase the Rear Seat to Floor height by 2", I would find a 5.70" dimension "C" which would correspond to a number 8 Axle Plate and utilize 1 spacer.

Note: There is a 1" gap between the rear of the seat sling and the front edge of the backpost, for this reason all Standard Seat Slings and Seat Rails should be ordered 1" less than the chair depth.

Note: If changing from a Ultra Lite seat sling to a standard seat sling a new frame must be ordered, as frame does not have necessary mounting locations.

Note: The Q7 has 8 degrees rearward to 27 degrees forward adjustment in 5 degree increments.

Note: Back frames on Inset Back measure 1" less than the chair width. Example: for a 16" wide chair, a 15" wide back frame would be utilized. In addition, 12" wide chairs do not utilize a Inset Back.

Note: When moving backrest rearward with a Depth Adjustable Back item 25 will be used as a bushing for item 14.

Note: Lanyard not included in kits; order separately.
